Cyber Security – the Prevention of Cyber Criminality – implemented

Cyber Crime is a threat for all businesses and private persons. This event shall provide insights to the current risks and give information on how cyber security measures are implemented in various companies.

An interactive round table discussion with the audience shall give the possibility to discuss the topic in greater detail

Topics & Speakers **Change in Security: Cyber Intelligence in times of digital transformation**
Michael Schneider / Sascha Maier

How Cyber criminals use social media to gain access to your business and commit crime

Richard Hyams / Michael Coggin

Legislative and Standardization Activities on Cyber Security at EU- Level
Enzo Peduzzi

Language The presentation will be held in English

Speakers: Michael Coggin, Anti-Cybercrime Solutions Designer
Syngenta Crop Protection AG, Basel

Mick was a detective within the Metropolitan Police for 30 years dealing proactively and reactively with all aspects of organized crime on a national and international basis. The last 8 years of his service was dealing with cybercrime investigations targeting pedophiles, terrorists and those attacking financial institutions. He has also worked in retail as a cyber security manager identifying those committing crimes against and from within the business.

Richard Hyams, Head of Anti-Cybercrime,
Syngenta Crop Protection AG, Basel

Richard was an accredited cybercrime technical investigator with the UK national crime agency in which he was the technical lead officer for a number of global cybercrime investigations. He has also worked in the media, insurance and agrichemical Industries as a cyber security specialist which has allowed him to gain an all-round knowledge of cyber security solutions.

Michael Schneider, Associate Director IT & Security, IWC Schaffhausen

Michael Schneider has been with IWC Schaffhausen since November 2010. In his function as Associate Director IT & Security, he is a member of the extended management board and is responsible for the areas of Business IT, Technical IT and Security and in particular for integral security. The areas of information security, personal security and object security have been merged and are now pursuing the same and common goals of integral security for IWC Schaffhausen from a single source. Currently, the construction and expansion of an OSINT-based Cyber Security Information System is being implemented in this area. The aim is to identify potential attacks at an early stage in the so-called area of interest and to initiate appropriate countermeasures. The goal is a cyber-resilient organization.

Sascha Maier, DM IT- & Information Security, IWC Schaffhausen

Sascha Maier is the DM IT & Information Security of IWC Schaffhausen (www.iwc.com), the well-known luxury watch manufacturer from Schaffhausen. In his function Sascha Maier is responsible for the entire IT & information security of IWC. He and his team secure the infrastructure by setting security standards, assessing security risks and implementing countermeasures. In addition, IWC has been actively promoting AI driven security, user awareness and cyber intelligence.

Enzo Peduzzi, President of Euralarm, Siemens Schweiz AG, Zug

Enzo Peduzzi has over 30 years of experience in the safety and security industry. Currently serving as Director of Industry Affairs at Siemens Building Technologies In addition to his current function with Siemens, he serves as President of Euralarm. Euralarm represents the European electronic fire and security industry, providing leadership and expertise for industry, market, policy makers and standards bodies.

Transport and Access From Basel SBB please take the tram nr.2 direction "Riehen Grenze" to stop "Badischer Bahnhof."
By car take the exit "Badischer Bahnhof" on A2 towards Germany and you will see the parking. At the Syngenta entrance you will receive a visitor badge and signage will show you the direction to the meeting room

We look forward to welcome many members and guests at this attractive event.

Best regards

ASIS International, Chapter 160 Switzerland
